

This ColecoVision Experience for the ADE contains over 400 ColecoVision games in ROM format. There may be duplicates and its possible that some of the ROMs may not work. Extract all of these folders as well as boot.dsk to a FAT32 formatted microSD card and then insert it into your ADE. When Adam Image Manager starts select a directory to open and then select the ROM to start. Use the [..] option on the screen to move back to the main directory listing.

I hope you enjoy this collection. If you are feeling generous you can always support the archive. Go to <http://adamarchive.org> and click on Donate
