

TapeWare Technology

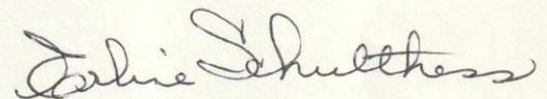

P.O. Box 95691
Atlanta, Ga. 30347
404-498-3831

Dear Prospective Customer,

Per your request, enclosed is a more detailed description of The RIB, our initial Data Pack tape offering. It is being offered for a limited time only at an introductory price of \$29.95. The programs and tutorials are contained on two data pack tapes.

We sincerely feel The RIB can provide you with useful and useable information and programming aids to increase the value and enjoyment you receive from your ADAM. We hope you agree!

Regards,

A handwritten signature in cursive script, appearing to read "Ernie Schultess".

TapeWare Technology

The Rib

Two Data Packs containing an introduction to the computing capabilities of the

ADAM*

Computer

Tutorials

- Word Processing
An introduction to Word Processing concepts plus specifics on using SmartWRITER*
- "Getting Started"
An introduction to Basic for the newcomer
- SmartBASIC* specifics
string handling, input/output, loops, graphics, etc.
- Practical Applications
menus, input techniques, output techniques, tape file techniques, etc.
- Program Development
interactive development of practical programs and games. Includes a description of the development process used to write the "checkbook" - a complete, menu-driven checking account management program included on the RIB-I tape. Includes many suggestions to help you develop your own custom applications.

Programs

- Utility
POWERFUL aid to programming that provides:
 - Automatic BASIC line renumbering with all GOSUBs and GOTOs resolved
 - Ability to merge (combine) BASIC programs
- Jumbochars
Allows you to design and print large block characters on the screen or the printer
- Hireschars and Loreshchars
Lets you design your own fonts and insert text into high and low resolution graphics screens

- Keyinfo

Shows values generated by all keyboard keys. Once known, these values can be used to have the many special purpose keys do things within your Basic programs.

- Numbering systems

Explains binary and hexadecimal numbering systems and how to convert values between them and between decimal and binary.

- Text generation and display programs

- "mastertext"

This program is used to deliver the tutorial text to your screen or printer. It can also be used to display any text you write using "entertext" under Basic.

- "entertext"

Allows you to create text files under Basic that "mastertext" will later format and display on either the screen or the printer.

- Memory dump program

dumps in your choice of hex or ASCII format

- Checkbook

A complete menu-driven checking account management program

Co-developed Programs (you help write some parts using the Program Development tutorial)

Subroutines

pre-written and debugged program segments you can easily insert into your own programs with Utility

all this on two Data Packs for an introductory price of **ONLY \$29.95!!**
