DEAR ADAMITE

Here is the latest ADAM COMPUTER and COLECOVISION GAME SYSTEM catalog from the world's largest full time supplier of Software, Game Cartridge, Hardware, and Service needs – ADAM'S HOUSE. We are in our FOURTH full time year of support, having operated in a part-time capacity in the prior four years since the ADAM System was marketed. Many said years ago that the ADAM and Colecovision Game were on their last legs, but I'm here to tell you that things have never been better. Our stock of components, parts, and supporting software clearly indicate that the ADAM and Colecovision enjoy tremendous support for now and the foreseeable future.

ADAM'S HOUSE has just purchased software and hardware valued at over $600,000 from Coleco Industries, Honeywell, and American Design Components. Adding this NEW, Latest Revision Stock to our existing inventory assures us of supplies to meet the demand we expect for well into the next century. And because we made such a large purchase, we made a good deal that has allowed us to bring down the cost of many items, and replace stock for some items that either disappeared from our shelves or were close to being exhausted. We now have a huge stock of ADAM Systems, Colecovision Systems, and associated peripherals.

While some original items like Coleco Disk Drives remain in short supply by virtue of the small quantity produced, we have resupplied our stock with NEW and IMPROVED higher capacity Floppy Disk Drives and Hard Disk Drives. The improvements mean longer life expectancy with cooler operation in the Floppy Disk Drives. And the Hard Disk Drives are super fast with large capacities that allow containment of numerous programs which are available virtually in an instant. We will set up purchased Hard Disk Drives with selected software which the customer purchases at the time ordered, and our Floppy Disk Drives include a package of software that includes RecipeFiler, SmartLETTERS and Forms, FlashCARD Maker with FlashBacks, and the Supergame, Zaxxon. With the purchase of an ADAM System, we include the same software along with two additional packages, SmartLOGO and TDOS (a CP/M replacement program). With the quality program packages you will find immediate enjoyment of your new component or system, FREE!

One thing that Coleco did NOT do when marketing the ADAM System was allow for the substitution of components when ordering. But ADAM'S HOUSE provides the means to purchase the ADAM with a Panasonic Dot Matrix Printer in place of the ADAM Daisy Wheel printer, giving the luxury of fast, quiet high quality printing and graphic picture reproductions. When this combination is selected, you also receive FREE software that assists you in Dot Matrix printing when using preexisting software that was written for print using the ADAM printer only. These "patches" quickly allow you to print from a variety of software: AdamCALC, AdamLINK, SmartBASIC, SmartFILER, RecipeFILER, SmartWRITER (the built-in word processor), and more. We also furnish you a program, File Printer, to professionally print SmartWRITER files on the Dot Matrix printer with justified columns and the many features, fonts, and font sizes that the Panasonic Printer provides. Our objective is to make purchasing from ADAM'S HOUSE a joyful experience that yields no bad surprises and includes the necessary means to get your computer UP and Running as quickly as possible.

If there are questions concerning the use, attachment, or instructions provided with the products we sell, we are available from 9 AM until 6 PM, Monday through Saturday of every week to answer any questions. And help doesn't stop there! In the future if you have a Computer or Colecovision problem arise – and let's face it, electronic components of any type don't last forever – we are available to assist you by phone or mail in the resolution of your problem. Many times a phone call is all that is necessary to cure the defect. Other times we can send you a circuit board or component that you can easily install yourself with the supplied directions. And when necessary you may be required to ship (by UPS or Parcel Post) a component that we will help determine as defective to us for repair. Our service department is at hand to receive the component, repair it and ship it back out within 24 hours. And if time is really of the essence, we can return components by UPS BLUE 2nd Day Air at additional cost, insuring you will have your ADAM up and running two days after we have return shipped the item. We include a Service Form in our catalog. It also lists many of the most needed circuit boards and components that we sell.

And don't overlook our LIFETIME SERVICE POLICY. This allows you to insure your Adam System against defects that occur. There are three policies that cover terms of 2 Years, 5 Years, and Lifetime. The cost is cheap, $25, $50, or $75 for lifetime coverage. Just fill out the form and return it with payment. If anything happens during the term, send the component to Adam's House and it will be repaired. Your only cost is the return shipping ($10). See the Lifetime Policy form for details.

There are NEW devices and components forthcoming. Since ADAM and Colecovisions are popular with over half a million owners in the USA and CANADA alone, there continues to be new hardware and software developed and produced just for their use! EARLY NEXT YEAR we will have the new Single Hard Disk Drives. Just in, the new 1.44 MB 3.6" Disk Drives! We will be talking about these new pieces of hardware and software in our monthly newsletter and buyer's guide, THE ADAM INTERNATIONAL MEDIA. In it we provide more attractive prices and sales for subscribers, as well as many free give aways. See the included page on our newsletter for more information, and how you can save money on two or three year subscriptions that also provide you with free Bonus Volumes from our ADAM PROGRAM LIBRARY. The program library is a collection of free distributed software that has accumulated in the last eight years for use with ADAM. Our program library is categorized into areas of use and type of program. A complete listing is available for selection from the 3000+ programs currently available.

Call us on our new 800 number (1-800-999-5040) and check our prices before ordering. WE GUARANTEE THE BEST PRICES available from an ADAM Dealer or WE'LL MEET THE PRICE when you provide us with written proof of a lower price on any item of hardware or software that we sell. And of course, what we sell is warranted for 30 days after purchase or we'll replace or repair it at our option. Software is warranted to be free of magnetic defects (some suppliers require the software be returned to them if a defect is determined -- see the manual or instructions provided with software for more details). Thanks for your inquiry and ADAM Support. Let us know if we can help.   - TERRY R FOWLER

UTILITIES
Utilities provide a means to use ADAM Hardware. For example, a RAM DISK is a space created in a 64K EXPANSION CARD to store programs temporarily. A variety of programs allow the creation of a RAM DISK on the 64K or larger Expansion Cards. The Expansion Card may also be used as a COPY BUFFER to do file transfers and media backup (it is best NOT to use your original datapack tape for booting programs -- make a backup and put your original in a safe place in case something happens to the backup copy). The larger the card, the more room for program storage or buffer copy transfers. Many programs achieve these two purposes in different ways, with extra functions, or in combination with other utility programs.

ADAM CONNECTION (IBM)....................[314] $24.95
- An MS-DOS program to run on an IBM, allowing transfer of SmartWRITER, SpeedyWRITE, and SmartBASIC documents from an ADAM Disk to an IBM Disk that can be read by IBM Word Processors like WORDSTAR. Or take an IBM document and transfer it to an ADAM Disk for use with ADAM. Also formats ADAM Disks. Allows interchange of documents between IBM and ADAM for purpose of printing or continuation of work.
ADAM'S DESK TOP..........................[526] $24.95
- Graphics environment to setup Ram Disk and utilize Dot Matrix of ADAM printer from SmartWRITER. Create Boot Files that can all be placed in RAM DISK or on Media together and run from menu. Copy contents of Ram Disk to smaller drive, and setup Ram Disk contents quickly.
ADAM'S DESK TOP ON CARTRIDGE.............[527] $39.95
- Same functions but pull Game Reset Switch to instantly boot program.
ADAMCALC PATCH..........................[129] $ 7.95
- Patches program to use a Dot Matrix Printer for printing.
ADAMLINK II PATCH.......................[130] $ 7.95
- Patches program to use a Dot Matrix Printer for printing.
AUTOBACKUP..............................[340] $14.95
- Two programs allow you copy programs from prepared media to the Ram Disk (use SmartDSK II or III first), and save the Ram Disk contents on disk or datapack. At least 64K Card Required.
BACKUP+ 3.0............................. $12.95
- Uses standard memory (and 64K if available) to provide copy functions, formatting, status block checking, and more.
COPYCART + V2.0 (Disk)..................[308] $17.95
- Makes a backup copy of your cartridges on 5.25" single, double, or 3.5 (720K size) disks, allowing many cartridges games to run from one medium's menu.
FILE MANAGER V2.........................[272] $17.95
- Easy to use utility package that not only provides many copy functions, but will edit files, print documents (to ADAM or Dot Matrix Printer), Format Disks (two at once if you have two disk drives) and initialize media. Powerful Editing function allows block edits. Copies to any size drive using any size memory expander card installed along with available standard memory. Copy using one drive or two. With manual.
FORMATTER II............................[278] $12.95
- Formats using one or two disk drives, and verifies in read and write modes for most thorough disk evaluation available.
INTEL-LOAD V1.0 OR V2.0................. Ea $12.95
- Creates a Fast Run program in either SmartBASIC V1 or V2 (with Intel-Load V2). Programs load over 10 times faster.

CARTRIDGES

Game Cartridges are available in limited supply unlike software on disk or datapack, but can be played on both ADAM or Colecovision Systems. Games load instantly by pulling the Game Reset Switch. The listing below includes all the known cartridges planned for production, some never produced to our knowledge. To keep our listing as current as possible we place a checkmark next to those cartridges currently in stock. The prices vary and are subject to change also, but each cartridge is marked with a price. You may also TRADE two cartridges of similar value for one, or send a list of cartridges for evaluation of worth in credit that may be used to purchase items from this catalog. Values are determined by stock on hand, demand, and condition - up to 50% of values provided below.

SINGLE HARD DISK DRIVE: $ CALL

Now a NEW hard disk drive will be available in either PowerMate or AdamNet version. PowerMate Version is faster, but AdamNet version is fully compatible with software. Includes expansion card (for slot #2) that also provides parallel printer hookup and large memory card addressing. Call for more details and availability. Price subject to change.

MEMORY CARDS

Expansion cards exist in two types: 64K, or 64 to 256K. The 64K Card will provide memory above the standard 80K built into ADAM for many programs. Next is an expandable 64K Card. The larger expandable card is useful for providing an electronic RAMDISK that utilities (page 2) create to store programs. Instant switching between these programs and the use of the card as a copy or printer buffer make having an expansion card very worthwhile.

ABOUT THE PROGRAM LIBRARY
The ADAM PROGRAM LIBRARY consists of many volumes of programs which require SmartBasic, SmartLogo, AdamCalc, CP/M2.2 or TDOS, etc to run the application program. Always boot the control program first, then insert the volume in the drive and CATALOG to see the directory. If documents or README files are revealed, use SmartWRITER to read.

SmartBASIC V1 or 1.1 programs are stored in "Fast-Load" format which brings the program from the volume into memory about 15 times faster. However, the program may not EXECUTE after loading. An error message may be displayed saying, "ILLEGAL FORM OF OS COMMAND". Ignor the message and type RUN followed by the Return Key. To load these Fast- Load programs (in binary form with an "H" file type) select the program to load and type it EXACTLY as it appears in the catalog as follows:

BRUN (the program name) followed by Return Key

Programs with file type "A" are normal SmartBasic saved programs that execute by typing: RUN File Name < Return >

CP/M2.2 or TDOS application programs first require you to load either CP/M or TDOS (see the catalog for purchase of these programs). 99% of the programs will run using TDOS4.56. To use the programs on a volume first get the directory after the system has been installed. The programs which will load end with .COM. You do not need to type .COM, only the name in either upper or lower case letters. Many programs in CP/M have been combined into libraries (designated .LBR). These program libraries must be deLibraried using a utility program, DELIB.COM (Vol 2B and others). Some files are SQUEEZED (.DQC - use USQ120, Vol 2C and others). Some files are ARCHIVED (.ARC - use UNARC, Vol 2CCC). Some files are CRUNCHED (.DZC - Use UNCR, Vol 2DDD). Files are saved this way to use less space. When separating, make sure you transfer the file and appropriate utility to a fresh empty media before separating or restoring.

Remember to use Volume 22 with SmartLOGO, Volume 23 with AdamCALC, Volume 24 with SmartBASIC V2 in Volume 20, and that Volume 33, 34, and 35 are used with PowerPaint, The Print Works, The Label Works, and other related art programs.

RELOADING A SPENT RIBBON
### FOR THE ADAM PRINTER

by Terry R Fowler

The ADAM Printer Ribbon was made the same basic shape as another printer using the Xerox (BR471) Ribbon. So the Xerox ribbon fits the ADAM Daisy Wheel printer, too. A copy of this ribbon was also produced and called the Hytype I - but it actually is not a Hytype I ribbon made by Diablo (Xerox). Each is slightly thicker, but latches into both type Print Heads used in the ADAM printer from my observations. The only problem is that these ribbons are no longer in manufacture and will soon join the Coleco Ribbon in the ranks of being obsolete. Save those cartridges. They easily come apart and can be RELOADED with ribbon pancakes we carry, making them even cheaper than the ribbon we currently sell for $5.95. Three ribbon pancakes cost $9.95.

Notice the RIBBON DIAGRAM below. The ADAM Ribbon has six points that pin the shells together which may be separated with a fingernail or small screwdriver, evenly with slight pressure at each pin until the shells separate. You must remove the O-Ring from the pulleys prior to separation, and be careful not to dislodge the mechanism so that you can see how to reassemble it. Notice how the ribbon advance knob holds and moves the ribbon to the takeup reel, from right hub to left, and how the O-Ring turns the takeup reel to take out the slack of the advancing ribbon. On the right side resides the fresh ribbon spool with the ribbon routed through a tension spring that takes some of the tugging and jerking motion out of the ribbons advance. Notice how ribbon routes through this small pulley. Now to disassemble and replace the old spent spool with fresh ribbon.

Carefully take the ribbon from its track and lift out the hubs. Remove the old ribbon, it is taped to the hubs with a leader. You might want to notice the tension of the spring where it attaches at the bottom of the right hub. It should move easily and the tension can be adjusted with a slight bend. Next comes the actually installation of the new ribbon on the spool. The spools are the same size on each ribbon, so the empty spool can press out the new spool's hub, taking its place. This can be accomplished by hand. It is not necessary that every last loop of new ribbon be transferred, so just cut any excess still attached to the pancake's hub and press the ribbon flush with the spool's edge. Now untape the leader of the pancake and feed it through the spring and rest of the track, taping it to the takeup hub so that the motion of both reels is clockwise as the ribbon advances. With all pieces back into position, reassemble the case by pressing the top shell back on the bottom shell and replacing the O-Ring. Just make sure that the dull side of the Ribbon is facing the paper when you type and you're ready to reuse the cartridge.

One of the most common problems associated with the ADAM Printer is that the ribbon stops advancing and the print fades, or fades in and out. Most of the time it is because the Print Head cannot pull the ribbon from the fresh side to the takeup side any longer. Often the ribbon is at fault, and releasing some tension on the spring guide on the bottom hub of the right spool will cure the condition. It usually happens when about two-thirds of the fresh spool has been used, and people throw away a cartridge that still has good ribbon left to use - it just won't advance. If this doesn't work, then an adjustment to the print head ribbon advance solenoid spring located under the cartridge slot will usually resolve the problem (the problem is that the solenoid will not return to rest and engage the next gear of the advance mechanism). Many of the old Coleco Ribbons were drying out, causing print fade in and out, too - so don't discount that you old ribbon is a dud. We have fresh ribbons in seal-packs and fresh pancakes for reloads.

The ADAM Printer is a good workhorse. It needs some care, and adjustments at times. With the reload pancakes you can even save some money and insure fresh ribbons for the near future. How long will our stock of Ribbon Cartridges last? How long will our supply of pancakes last? Both answers are unknown. You might consider a small supply just in case while they're available at this low cost. 3 pancakes for $9.95 plus $5.00 shipping, and Ribbon Cartridges are $5.95 each, 3 for $16.95 with a $5 minimum shipping and handling charge. Our current stock of ribbon cartridges are an exact duplicate to the ADAM Ribbon cartridge - both in size and thickness. We don't know who manufactured them, but we have a limited supply in stock right now. [ADAM'S HOUSE, RT 2 BOX 2756, PEARLAND, TX 77581 1-800-999-5040]
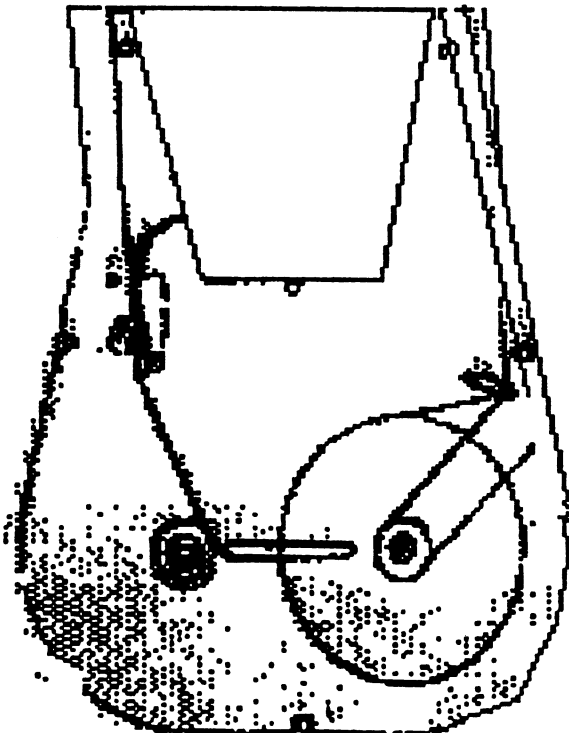

PLACING ORDERS

PHONE ORDERS - Phone orders may be placed using a Visa or Master Card during normal hours of 9 AM - 6 PM Central Time, Monday through Saturday except holidays by calling 1 - 800 - 999 - 5040. A 4.5% Bank Fee is charged for the convenience of using a charge card. Adam's House prices all products low on a cash basis without the addition of fees that would raise the cost to all customers.

MAIL ORDERS - Mail orders are accepted on Adam's House order forms with payment in the form of personal check, money order or bank check, or Visa or Master Card number and expiration. Personal checks require 7 to 10 working days to process through the bank unless a Visa or Master Card number and expiration is placed on the check or order form. When using Visa/Mastercard for payment, please include a 4.5% fee of the total of the order including subtotal, shipping, insurance, and tax (if in Texas). Orders are subject to authorization from Visa/Mastercard. Please sign the order form and print the name on the card exactly as it appears. There is no minimum order amount. GIVE YOUR SHIPPING ADDRESS - UPS CHARGES $3.50 FOR ADDRESS CHANGES WHICH WE MUST CHARGE BACK TO YOU!

COD ORDERS - We do NOT accept COD orders, except from established customers having a Visa or Mastercard number on file with us (USA only).

CANADIAN ORDERS - Payment for Canadian orders can be in the form of Postal or U.S. Bank Money Orders in U.S. funds or by Visa or Master Card.

USA SHIPPING AND HANDLING - The following MINIMUM fees apply:

UPS GROUND - $5.00 Minimum per order ($100 insurance)
Add 50 cents for each additional pound by ground. ALLOW SEVEN WORKING DAYS!
UPS 2ND DAY - $6.00 Minimum per order ($100 insurance)
Add $1 for each additional pound by 2nd Day Air. DELIVERED 2ND DAY AFTER SENT
1ST CLASS MAIL - $5.00 Minimum per order (less insurance)
Add 75 cents for each additional pound by mail. ALLOW 1-2 WEEKS FOR DELIVERY! Insurance - Add $1.50 for $100.

These minimum fees cover orders up to one pound in total weight for shipment in the continental United States. This catalog does not provide the weight of our inventory items. A rule of thumb to apply is that two pieces of software will ship for one pound, or one expansion card. A three ribbon pack is one pound. Hardware components generally ship by UPS Ground for less than the above rule of thumb: A disk drive ships for $8, a Colecovision system for $8, a printer for $10, a PowerMate Hard Drive for $10, an Adam System for $15. When combinations of items are ordered, shipping and handling usually will be very little more than the heaviest item(s). The use of Visa or Master Card insures that the appropriate shipping and handling will be charged. Otherwise, please include enough in payment to avoid delays - a credit or refund (your choice) will be issued with your order when overpayment occurs.

FOREIGN SHIPPING AND HANDLING - Minimum shipping is $7.00 for up to one pound by AIR MAIL. Add $3.00 for insurance up to $200. Canadian customers: Add $1.00 for each extra pound up to 10 pounds. 10 lbs. - $17, 15lbs. - $23, 20 lbs. - $31. A disk drive will ship for $17 plus $3.00 insurance. An Adam System ships for $60. A printer ships for $31. ORDERS OVERSEAS - Orders are taken with Visa or Master Card only. The order total is charged first, and the shipping is charged separately after the shipment and you are notified of the date of shipment along with the second charge amount.

WARRANTIES/RETURNS - Hardware is warranted for a period of 30 days. Software is warranted for a period of 30 days and subject to manufacturer terms (see individual instructions from manufacturer). Adam's House agrees to repair or replace at our option any defective software or hardware upon return. Customers must call or write concerning problems encountered prior to return shipment. If no problem can be identified the customer is responsible for return shipping! Unauthorized returns will be refused. Cancelled or returned items incur a 15% restocking fee of the amount paid or the current price (whichever is lower) deducted from the refund. After 30 days a credit is given only. After 60 days no credit or refund is possible for any return. Any Visa or Master Card fee will be refunded (Visa/Mastercard orders will be fully credited with a separate restocking charge plus the shipping to follow). Let us help insure that you order what you need or really want by calling. Adam's House tests all hardware and most software before shipment to help insure total customer satisfaction!

PRICES - All Prices herein and terms are subject to change.

STOCK QUANTITIES - Adam's House stocks over $600,000 worth of new Adam Hardware and Software. However, due to manufacturer decisions some items are in short supply and may be out of stock. We provide automatic back-order of out of stock items which may be transferred to credit or refunded at the customer's request. Adam's House will substitute items of equal value and use for items that have been discontinued or remain unavailable.

TECHNICAL SUPPORT - If problems occur after receipt of an item, call Adam's House 9 AM - 6 PM Central Time, Monday through Saturday. We will be glad to assist you in the use of products you purchased from us.

FAX ORDERS - At this time Adam's House does not provide a FAX line for receipt of orders. In the future a FAX will be added as the market increases for this service. Please tell us that you use or have a FAX and this service will be added as a higher priority.

ADAM INTERNATIONAL MEDIA subscribers enjoy the excitement of knowing that orders they place may incur a BONUS: each multiple of Order Invoice number 1000 (or the closest without being over multiples of 1000) will be completely FREE. The complete order and shipping will be sent FREE when a subscriber orders and includes his or her subscriber number and the multiple invoice number occurs.

Please remember that we carry a full line of service parts for the ADAM and Colecovision systems. Many of these parts are NOT listed in this catalog. Call us for price and availability. Also see our SERVICE FORM for many major items available for repair and low cost replacement.

NO MINIMUM ORDER Order anything you like and add our low minimum processing (shipping/handling) fee plus any other relevant charges.

SUPPLIES OF SOME ITEMS MAY BE LIMITED. IF AN ITEM IS NO LONGER AVAILABLE OR OUT OF STOCK YOU WILL BE GIVEN A CREDIT WHICH IS REFUNDABLE ON REQUEST. WHEN ORDERING GAME CARTRIDGES GIVE ADDITIONAL CHOICES IN CASE WE ARE OUT OF STOCK.

ADAM INTERNATIONAL MEDIA

The ADAM INTERNATIONAL MEDIA (AIM) is published ten times each year with two expanded issues published in May/June and Nov/Dec. The newsletter content is devoted to articles on the ADAM Computer and Colecovision Game Systems, reviews of new games, software, and hardware for those systems, and a variety of columns: Editorial, News, Technical Corner, Library Corner, Communication Corner, Sale items and ads, etc. AIM periodically includes an ADAM PROGRAM LIBRARY LISTING of all public domain software currently available for the ADAM System divided into Volumes that may contain up to 50 programs each. Our library now contains almost 200 Volumes of programs for use with SmartBASIC, CP/M2.2 or TDOS, SmartLOGO, AdamCALC, and more. There are unreleased games, artwork, music files, utilities, spreadsheets, help programs, and more categorized and ready for use. These volumes may be purchased -- the more you buy at a time, the less the cost per volume. Volumes are also awarded in exchange for articles or programs contributed to AIM. Subscriber may also qualify for bonus volumes when resubscribing or subscribing for a term longer than one year. These programs are essentially free, our rates reflecting only the costs involved in procuring, maintaining, and reproducing the volumes and equipment used. We continue to add regularly to the APL and feel it is the finest library of programs available for the ADAM Computer System. In addition, we maintain a Documentation Library to support the use of these programs. Documentation sheets are included free with volumes. There may also be Comprehensive Manuals available at additional charge for some volumes.

While we feel it is important to provide low cost programs and documentation in support of the ADAM and those subscribing to AIM, ADAM'S HOUSE serves to provide low cost Commercial Programs, Hardware, and Service for its customers and AIM Subscribers. While ADAM'S HOUSE serves the ADAM Community in general, AIM Subscribers receive special catalog prices as advertised in our newsletter. These savings can amount to many times the cost of a yearly subscription. Service is performed within 24 hours of a component's receipt, but AIM Subscribers receive an extended 90 day warranty after the repair instead of 30. And for a small fee at the time of repair, an extended service contract may be obtained. Since we have learned from repairing ADAM and Colecovision Systems, we provide our AIM subscribers many troubleshooting tips and ways to make simple repairs -- saving you time and money.

ADAM'S HOUSE has purchased an exhaustive supply of spare parts and components so that we can maintain our business and support into the next century and beyond. With our commitment, we have recently implemented a new longer term for subscriptions that will save you extra money. While postage and UPS rates have both gone up and will continue to go up, we have determined to keep our subscription rate low at only $20 annually (USA), $22 (Canada), and $32 (Overseas). When you subscribe, your subscription begins with the first newsletter in the current quarter, or the quarter of the year you select. A subscription for TWO Years is $36 (USA) and $40 (Canada). A THREE Year term is available for $50 and $56. When you subscribe for Two years you also receive either 1 bonus datapack or 2 disks. Three year subscriptions earn a bonus of 3 datapacks or 5 disks. You choose these volumes from our ADAM PROGRAM LIBRARY. And each year you renew your subscription you may also choose a free disk or datapack volume. If you renew for an extended period, add one volume to the above bonuses already mentioned. If you just want to take a look, send $3.00 for a sample newsletter from a previous month.

We began publishing newsletters in 1984 as a club known as gHAAUG (greater Houston Area Adam User Group). These newsletters are compiled into books and may be purchased for the years listed below at the same rates as our current yearly or extended subscriptions. Just circle the year(s) desired and send your payment with this form (Texans must include 6.75% Tax) to:
