(801) 825-5336

2608 WEST 6000 SOUTH
ROY, UTAH 84067

Hello! Thanks for your interest in my company. I am offering several volumes of Public Domain programs for the Adam. Public Domain means that the programs are not copyrighted and are distributed free of charge. My costs are low because I am only charging a small copying and materials fee.

In the interest of time, I have assembled the programs into various sub-groups. Not only does this make it easier to find your programs, but it makes my job easier and helps keep my prices down. You must order the entire volume of programs. You can not 'mix and match'. Sorry, but I tried it the other way and it was just too much work.

As always, I am interested in trading software. Details on this can be found on the last page. If you have a modem, we can trade over the phone lines! Get in touch with me if you are interested.

Again, thanks for writing. If you have any questions or comments feel free to contact me. I love the Adam and want to help you get the most out of your's!

Truly,

Gordon Meyer

Volume 100

 Heart - Graphics. Valentine Card
 BlackHole, Crystal and Spiraler (graphics)
 Crosswords - for the kids.

***** Special Release *****

HUNTER - For the AdamLink Modem. This program is an auto-dialer similar to the one used in the movie 'War Games'. HUNTER is the first SmartBASIC program to access the modem and is the only non-Coleco program to use the built in dialing features. This is a copyrighted program (ie: NOT in the public domain). It is self-loading and available on disk or data pack. Dials numbers in sequence...up to 50 per hour. Only \$18.00 postpaid. Sorry...HUNTER is not available for trading.

CP/M 2.2 PROGRAMS

I am offering Public Domain CP/M programs in Data Pack format *ONLY*. For disk format contact Elliot Associates, 24000 Besemer Street, Woodland Hills, CA 91367

All programs require ADAM CP/M 2.2 to run

CP/M Volume A Modem7 Update
Includes source code and other files. Will *not* operate with the AdamLink Modem with out some changes.

CP/M Volume B Master Catalog System #2
Sorts, and keeps track of up to 1000 CP/M disks or DDPs

CP/M Volume C The Secretary
Get a new word processor! Includes all the advanced features Coleco left out...centering, titles, chaining, justification, multi-spacing and more. Works great.

ORDERING: Available on DDP only. EIGHT DOLLARS each volume. This include postage. This price applies only to CP/M Volumes A, B and C.

** SPECIAL OFFER **

I have a special CP/M Telecommunications Volume available to AdamLink owners. This volume includes *working* versions of MODEM7.COM and MEX.COM...two super terminal programs. Between these two programs you can transfer files using ASCII, XMODEM (both CRC and CHECKSUM) and CIS 'A' protocols! Includes full instructions for using on your Adam. This special CP/M TELECOMMUNICATIONS VOLUME is available on disk or Data Pack for the price of TEN DOLLARS. (\$10.00 US) This price is only for this one volume and is the only CP/M software I have available on disk. That's how special it is!

ORDERING INFORMATION:

To order on Diskette - Send EIGHT DOLLARS (\$8.00 US) for each volume you would like. This includes postage etc. Be sure to indicate your selection.

To order on Data Pack - Send NINE DOLLARS (\$9.00 US) for each volume you would like. This includes postage etc. Be sure and indicate your selection.

TRADING - I will trade for any of the programs listed. Just send me a disk or data pack of your programs and indicate which of mine you would like. There is no charge for trading. You can mix and match from all the volumes. I trade straight across, one for one, and will not accept programs already shown or printed listings. NOTE: Be sure and back-up your programs before sending them to me as sometimes I need to erase the entire data pack or disk before I can copy to it.

GENERAL INFORMATION:

Most of these programs were written and submitted by other ADAM owners from across the country. As such, some programs are better than others. Some programs do not have instructions but they can usually be figured out by running or listing the program and looking for REM statements. When you get your order you should CATALOG and look for any TXT, DOC, INSTRUCT, or READ ME files. Using your word processor, 'GET' these files and read them before running the programs.

MODEM OWNERS: If you are interested in downloading some great ADAM files than call the Weber State College BBS. Available evenings and weekends. (801) 626-7906

I have a complete set of Technical Manuals for the system and welcome any questions. If you call and reach an answering machine please leave a message authorizing me to call back collect.

Regular customers will automatically be sent catalog updates. Volume contents subject to change.
