On your journey, you must collect all the diamonds on each screen, avoid traps!, collect keys to open locked doors as well as collect bombs to destroy brick walls for when the going gets tough. Any of the objects (including walls and boulders) are hidden under grass until you run into them. Tremendous graphics, sound effects and game play make this one of the best games ever made for use on the ADAM and if that isn't enough and you survive all 30 screens, you can design your own sets of 1 to 30 screens with "BOMB DESIGNER" which is also included. Now includes the ability to start at any of the 30 levels. (Memory Expander Required!)

[ ] BRAINSTORM (D/DP) #702...\$16.95 Seven different shaped blocks fall down across the screen, one after the other. The object of the game is to keep the blocks from piling up to the top while collecting letters to help you solve the phrase at the top of the screen. This is done by moving the blocks left and right with the hand controller and rotating them clockwise with the left fire button as they fall. If you can completely fill in one horizontal line, that line disappears and the rest of the puzzle moves down. If you complete a line with a letter in it that is also used in the phrase, that letter will appear in the phrase. You can also make the shape fall faster or pause the game. There are 25 stages, 4 skill levels and three categories (Normal Phrases, TV and Movie or ADAM related phrases) to choose from. Each category has hundreds of phrases and every time you play, ADAM will keep track of the phrases you have used so none of them will be repeated until you have used them all. Two separate games are included: GAME A which is the ADAM version of TETRIS rolled into a Wheel of Fortune game and GAME B which is the traditional rendition of TETRIS.

[ ] DINOSAUR DIG (D/DP) #703...\$16.95 The exciting new game show where you compete against the ADAM or another player. The object of the game is to find dinosaur bones and build a Tyrannosaurus Rex! Win money! Buy land! The dinosaur will be pieced together as each bone is found. Use strategy on the land screen to win one of the eighty-one squares of land available before the computer does. And if you stop the spinner on DIG on the game board, you get to actually dig in any of the squares of land that you own. The game has colorful hi-resolution graphic screens and Coleco-like SmartKEY Menus. ADAM plays a real mean game! (Memory Expander Required!)

[ ] GHOST ZAPPER (D/DP) #704...\$11.95 This is a fast paced shooting game where you are placed in a haunted house and must clear the house and surrounding area of all the ghosts and other assorted demons which peek in windows and around corners. You start each screen with five Ghost Zappers, each ghost or demon that gets away will cause the loss of a zapper gun. You must clear several rooms in the house and the graveyard in order to get a chance to reach the bonus screen where you have to shoot the four ghosts on the screen which are concealing letters of the word 'ADAM' behind them. Includes a Hall of Fame for storing the best scores. (Memory Expander Required!)

[ ] MIND OVER ADAM (D/DP) #705...\$11.95 Based on the popular game "MASTER MIND", with high resolution graphics, animation and sound! You play against ADAM and have 8 chances to figure out the four color pattern ADAM has hidden. You must have the correct color and position of the color in order to win. You are given points for each correct guess and bonus points for each level completed. You must complete all five levels to beat ADAM. The top eight scores are entered into the Hall of Fame using a tremendous rendition of a Ouija board.
