

Catalog for the **ADAM**TM computer

REEDY SOFTWARE
10085 60th Street
Alto, MI. 49302

The following software packages will run on any Coleco ADAM Family Computer System

SmartTYPE

SmartTYPE is a word processor for the ADAM that has all of the features left out of SmartWriter. SmartTYPE is SmartKey menu driven and very user friendly. SmartTYPE features:

- *Left line justification.
- *Right line justification.
- *Left and right line justification.
- *Auto center line.
- *One or two column printing!
- *SmartKey menu driven with messages.
- *Instantly move to the first, last, or any other row in text.
- *Save and load file.
- *Complete multi-drive program.
- *Multiple column widths.
- *Insert and delete rows.
- *Stop/start printing!
- *Auto-line feed!
- *Multi-line spacing!
- *Print whole text or specific rows.
- *See disk/data pack directory within program.
- *Use of ESCAPE key to abort procedures!
- *Pull text left (like SmartWriter's backspace).
- *Pull text right.
- *Row, column, column width, filename indicators.
- *Color text!

This improved version of SmartTYPE (version 1.1) also has these advanced features:

- **Self loading (Just press COMPUTER RESET).
- **Very FAST bi-directional printing!
- **Added function keys (TAB, HOME, etc)!
- **AND MUCH MORE!

SmartTYPE's justification, centering, and two column per page printing give your text a very professional look! SmartTYPE comes complete on a data pack or disk, and includes an owners' manual and a limited 30-day warranty.

PRICE: DATA PACK - **\$24.95**
Prices include postage!

DISKETTE - **\$22.95**

Reedy Library

The Reedy Library is a fine collection of many fun and essential SmartBASIC programs, and comes complete with an owner's manual. Programs included:

MICHIGANA JONES

You play Michigana Jones in this large, full-length text adventure. Your mission is to get in and out of the "House of Misteree" with the Golden Idol. The house has four levels, fifty rooms, and is literally huge! This fun and challenging program includes monsters, clues, traps, and more! This adventure takes full advantage of ADAM's powerful memory!

THE HI-RES TEXTEDITOR

This is a subroutine that you can put in your own programs. It allows you to print characters in HGR and HGR2 hi-res graphics. Print right next to your graphics in all the colors available in hi-res. The font is almost identical to ADAM's own except bigger, bolder, and more colorful. Great for educational programs. The TextEditor includes all capital letters, numbers, and ? ! . ; + - = %

VIDEOPAINT

This is a very fun and useful program that enables you to draw with the ADAM controller, and save the picture to a data pack or disk! Why hassle with sloppy commands like HLINE, VLINE, PLOT, or graph paper? The directions are built-in, though you hardly need them. This program is menu-driven and a real pleasure to use. Features: "Lift up brush", draw/edit, save, load, clean slate, 15 colors, change color-to-color, and more! The pictures you make can then be used in your own programs with SUBmaker (below), SAVESUB, or LOADSUB. Pictures can greatly enhance your own programs. Imagine drawing a picture with VideoPaint and using it as the picture, game board, or maze in your own programs!

PICTURE SUBROUTINE MAKER

This program will actually add the subroutine needed to use a picture in your own program! It loads the picture you made with VideoPaint and then adds the subroutine, DATA statements and all, to your program. This makes using pictures very easy, just use a GOSUB! SUBmaker even lets you decide what line number the subroutine should start at and the increments to go by!

The Reedy Library also includes: ADAMCode, ADAM+adding, Dec-to-Hex, SAVESUB, LOADSUB, SAVEPICT, LOADPICT, and LOGO (a picture file example)! The owner's manual describes each program and has some useful programming tips (POKES, etc). This program package is a great addition to any ADAM user's library.

NOTE: Modest programming knowledge may be needed to incorporate the TextEditor, SAVESUB, and LOADSUB subroutines into your own programs.

PRICE: DATA PACK - **\$24.95** DISKETTE - **\$22.95**
Prices include postage.

The NIAD Adam Users Group rated THE REEDY LIBRARY an 'A' (9-85)!

KopyKat

KopyKat is a backup utility that copies entire DDP's and disks.

- Copy data pack to data pack with one or two data drives.
- Copy disk to disk with one or two disk drives.
- Copy data pack to disk.
- Copy disk to data pack.
- Self copy provision - backup KopyKat itself.

KopyKat copies all commercial software except some Super Game Packs. Super Games like Buck Rogers and Dragon's Lair can be copied; while others, like Super Donkey Kong, can't. KopyKat also lets you copy most data pack software to disk, making loading time much faster. Successfully backup SmartBASIC, SmartLOGO, SmartFiler, ADAMCalc, and most others! KopyKat will also make copies of your SmartFiler data bases! KopyKat comes complete on a data pack or disk, and includes an owners' manual and a limited 30-day warranty.

PRICE: DATA PACK OR DISKETTE - **\$19.95**
Price includes postage.

NOTE: KopyKat is intended for your own personal use only. Copy and distribution of copyrighted software is illegal.

WATCH FOR MORE ADAM SOFTWARE IN THE FUTURE!
