ADAM™
PERIPHERALS & ACCESSORIES

The ADAM™ package includes all the hardware a computer customer needs to immediately step into the ever-growing world of word processing, game play, and BASIC programming. But the increasing sophistication of computer users provides a solid market for accessories and peripherals that make ADAM™ even more versatile and expandable than any other home computer system!

Our peripherals allow the user to double available storage capacity, use 5¼" disks, expand memory, and connect to a telephone line to access several different information sources.

Efficiency, cost-effectiveness, and expandability. ADAM™ peripherals were designed with these principles in mind!

ADAM™ SECOND DIGITAL DATA DRIVE

New convenience! New possibilities! The Second Digital Data Drive doubles the system's on-line storage capacity, allowing up to 500K bytes of data or program information to be stored on two Digital Data Packs. It allows the user to access, copy or transfer stored information between two separate Digital Data Packs without having to stop and change them.
#2409

ADAM™ 64K MEMORY EXPANDER

Improve ADAM's™ memory by 64K bytes of Random Access Memory (RAM) for a total of 144K with this Memory Expander! It increases the workspace capacity of SmartWriter™ Word Processing by 64,000 characters . . . a full 32 pages of double-spaced text! Once it's in place, users can run more complex programs.
#2562

ADAMLINK™ DIRECT CONNECT MODEM

Here's an advanced 300 baud full duplex modem that couples directly to the phone line. No additional interface or clumsy receiver cups are needed.

The ADAMLink™ Telecommunicator software package is included incorporating such advanced features as automatic dialing from the keyboard, wordwrap, and the ability to talk to other ADAM™ owners. Uses for the Modem include electronic mail and banking, as well as a direct access to information services such as CompuServe, The Source, Dow Jones and ADAM™ On-Line. Included is a CompuServe demonstration package allowing two free hours of use for those who subscribe.
#7818

ADAM™ 5¼" DISK DRIVE MODULE

This disk drive is ideal for users who prefer the disk storage medium. Store up to 160K bytes on easy-to-use 5¼" single-sided, double density flexible disks. Information retrieval is fast, making it exemplary for applications requiring frequent disk access. Most ADAM™ software will be available on 5¼" disks as well as the standard Digital Data Packs. Up to two disk drives may be connected to ADAM.™
#7817

ADAM™ ACCESSORY KIT

Handy items for general maintenance—all in one complete package! Included are: 3 Daisy Wheels (Pica 10, Courier 72, and Emphasis typefaces), a Replacement Ribbon Cartridge, a Tape Head Cleaner Kit, a Blank Digital Data Pack, and a set of easy-to-follow instructions.
#7816

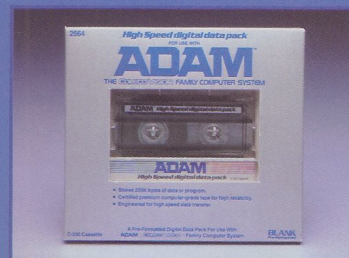

ADAM™ REPLACEMENT DAISY WHEELS

Courier 72 (#7820) is a bold, professional typeface, used with many business typewriters.

Pica 10 (#7821) is the most popular typeface for home electric typewriters.

ADAM™ BLANK DIGITAL DATA PACKS

Each high-density, high-quality data pack is specially designed for use with ADAM.™ Blank packs store approximately 250,000 bytes of data and are engineered for high-speed data transfer.

PERIPHERALS & ACCESSORIES

ADAM™ DISKETTES
Pre-formatted—Professional Quality
These preformatted 5¼" blank flexible diskettes hold up to 160K bytes of data each, and store and retrieve information with high speed and high reliability. There's also a write-protection notch to protect important programs! Packed five to a package, these single-sided, double density diskettes are made especially for ADAM™ from premium quality materials to ensure long life.
#7824

ADAM™ REPLACEMENT RIBBON CARTRIDGES
Ribbon cartridges contain multistrike carbon film ribbon for high-quality impression. They are easily installed in the SmartWriter™ printer and are available in black only.
#7806

MONITOR CABLE
This specially-designed cable connects the stand alone ADAM™ to a color monitor instead of a television set and works with any standard video/audio monitor. The four foot cable connects from the auxiliary video socket on ADAM™ to the audio and video jacks on the monitor.
