

COLECO CORPORATE CENTER

Dear Adam Owner,

Congratulations on your purchase of ADAM™...the most streamlined state-of-the-art home computer available in one complete package! And now that you've had a little time to get used to operating and programming your new ADAM™, you're probably ready and anxious for a new challenge in the area of software. This special offer has been made available to you in an effort to effectively respond to your software needs.

The ADAM™ Home Software Library has been sent to you absolutely free, as part of your initial purchase of your ADAM™ Family Computer System. This collection contains 32 valuable programs, in six separate series. In your package, you will find four (4) Digital Data Packs and a 250 page instruction book which explains each program and provides codes to allow program modification. There are practical programs for home or business, teaching programs for all ages, brilliant graphics designs, challenging games, mathematics, and even a series of fascinating shorter programs.

With the ADAM™ Home Software Library, you're in command of more power than ever!

There are Applications Programs!

- ° Biorhythms: Predict and chart your good and bad days.
- ° Checkbook: Keep an eye on your checkbook balance with computer ease and accuracy.
- ° Decide: List and analyze all your alternatives to make the best possible decisions.
- ° Loan: Instantly calculate payments at various interest rates for mortgages, car loans, etc.
- ° Mileage: Find out if you're getting the most out of your gasoline. Keep track of your car's mileage!
- ° Quest/Exam: Determine the result of questionnaires and examinations.

There are Educational Programs!

- ° Arithmetic: Drill school-age children in math functions.

999 Quaker Lane South, West Hartford, CT 06110 (203) 725-6000

(2)

- Flashcard: Create electronic flashcards and use them as study aids.
- Metric: Put your computer to work teaching you the metric system.
- Numbers: Help preschoolers gain a better understanding of numbers and how to use them.
- Tachist: Increase your reading speed with this advanced tachistoscope program.
- Vocab: Expand your word power to obtain a better working vocabulary.

There are Game Programs!

- Decode: Break the secret code concocted by the computer.
- Groan: An electronic dice game that'll really make you think!
- Jot: A word and logic game you'll play constantly!
- Obstacle: Compete with a friend in this arcade-style game!
- Roadrace: Keep your racer on the road, if you can!
- Wari: It's a battle of wits with the computer in this updated version of an ancient African game of skill.

There are Graphics Display Programs!

- Kaleido: Create a spectacular kaleidoscope with 8-point symmetry!
- Sparkle: Hypnotic, sparkling patterns make this one a real dazzler!
- Squares: Assemble beautiful visual effects with overlaying concentric squares.
- Walloons: Fun for everyone as they follow the acrobatic excitement of the flying Walloons!

There are Mathematics Programs!

- Curve: Perform least-squares curve-fitting.
- Diffeqn: Solve ordinary differential equations.
- Graph: Display a simple graph of a function. Perfect for school or business!
- Simeqn: Solve simultaneous linear equations.

(3)

° Stats: Perform standard "statistics of populations" calculations.

There are Miscellaneous Programs!

° Birthday: A captivating program that determines the odds of identical birthdays within a group of people.

° Pi: Approximate the value of pi with this handy program.

° Powers: Quickly calculate powers of integers up to 250 digits.

° Pythag: Generate complex Pythagorean triplets: $(a^2+b^2=c^2)$

You'll have trouble tearing yourself away from ADAM™ once you get involved with the Home Software Library! It's hours of fun! And once you discover a strong area of interest, a subject you wish to improve, or game you just want to play with the skill of an expert, there's plenty more ADAM™ software to keep you learning, growing, and entertained!
