COLECO SHIPS NEW MONITOR CABLE
FOR USE WITH ADAM 2410

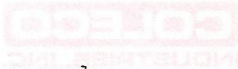

West Hartford, CT -- Coleco has begun shipment of a new monitor cable which will allow ADAM users to connect the memory console of their ADAM Family Computer System to a color composite monitor.

The four foot cable connects from the auxiliary video socket on ADAM to the audio and video jacks on the monitor. Made especially for ADAM, Coleco's monitor cable includes adaptors for the most popular monochrome and color monitors on the market today.

Other accessories produced by Coleco include ADAM replacement ribbon cartridges, blank digital data packs, replacement daisy wheels and an ADAM accessory kit.

999 Quaker Lane South, West Hartford, CT 06110 (203) 725-6000

New hardware includes a 64K RAM memory expander, a second digital data drive, ADAMLink direct connect modem, ADAM 5 1/4" disk drive and the Autodialer, which comes packaged with the Address Book Filer software in digital data pack or disk formats.

During the coming months, Coleco will ship many new titles for the ADAM Family Computer System in both the disk and digital data pack formats in the four categories of family learning, home information management, entertainment and languages and programming aids.
