

Gust Buster

by AtariAge member Northcoastgamer

- No need for joystick, just the side buttons and keypad on the coleco standard controller, and it works great for me.
- Scoring is low, 2,000 for selling all 25 balloons and 2,000 bonus for orbiting the park.
- The winds don't start changing direction until the 4th pass of the park.
- An extra man is awarded for every 10,000 points scored.
- Fly low below the fireworks just above the fireworks sign.
- Flying at the highest point at the top of the screen gets you safely past the fountain.
- Fly just above the palm trees to get past the bird.
- Fly low just above the building to get past plane safely.
- You can fly through the elephants head and trunk at lowest point, he can't hurt you, only the peanut can.
- Get a decent distance past the parachute ride, palms trees and fountain etc, before descending, a quick wind change will send you crashing into obstacles.
- When the wind does change, drop low to stop moving, and wait for it to change again.
- Keep 2-3 balloons as backup until you can replenish at the popcorn truck.
- If you lose a balloon in air, keep in mind you still have to switch to another balloon in order to rise or descend.
