

Donkey Kong Jr. Super Game
Prototype 5 Screen Versions

There are a number of versions of the Coleco Prototype that made it out the doors of Coleco. The latest Rev. 14 does not require a code to be entered via the hand controller for the 5th Screen to be unlocked and is therefore the best available version. A number of Revision 13 versions exist that require specific Hand Controller inputs in order to unlock the 5th Screen which may include either:

- At the Player Selection screen, press the Left and Right firebuttons at the same time.
- At the Player Selection screen, press and hold the Left and Right firebuttons while you enter the following sequence on the keypad: 1 3 2 1 2 1 2.

Remember, entering 9 8 9 at the Hall of Fame screen will clear all entries in all the ADAM Super Games!
