November 16, 1994

Dear Fred,

Thank you for your letter. Enclosed is our current catalog #55. You will notice that things have (and continue) to change with ADAM and the available products. Many things are now becoming very hard to find and make available to you.

GO-DOS does not require a mouse. It works with the keyboard keys (arrow keys primarily) or hand controller. The public domain listing is in our ADAM INFORMATION KIT and is available for only \$5. We provide nation wide repairs utilizing new circuit boards and components as explained on our service form in the catalog for a flat fee (usually \$50, plus \$10 return shipping). We do not repair most lower cost items anymore since you can buy NEW Modems, etc., that cost less or equal to repaired ones. The new Printer Interface is far superior to older types and also would cost equal to the cost of repair. The ADAMLINK Modem and Printer Card are both only \$39.95 each.

We searched the world over to find new Game Cartridges and suppliers. Many of our rarer cartridge game titles come from Europe where CBS Licensed Shops still distribute them. They have the right to manufacture many game titles. We have an agreement with them to provide black label, unboxed games, that cost us (and you) much less. These are reflected in our current price listing of CARTRIDGE GAMES. Where possible, we always ship boxed original game cartridges. If you are a collector, you can always specify your desire on the order, or call for specifics.

Thanks for your questions. I hope we can do business.

Sincerely,

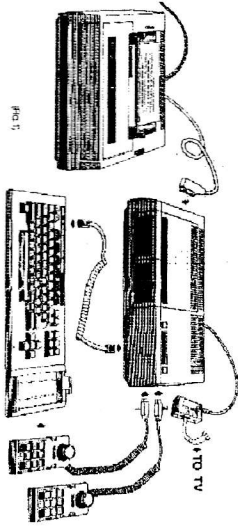

Terry R Fowler
Owner
